

COLORS AND WOODGRAINS THAT PERFORM

Deceuninck's exclusive Solex™ technology offers a wide variety of durable, interior woodgrains and exterior colors.

An expanded selection of Special Order, interior woodgrains and heat reflective exterior colors provide weather resistance, color retention and enhanced curb appeal.

Lead times and minimum orders can vary depending on the color selection.

A SPECTRUM OF COLORS

MIX, MATCH AND MAKE MAGIC WITH SOLEX™

No matter what the design calls for, Solex lamination technology provides today's richest exterior colors, stunning natural woodgrain details and metallic architectural finishes to create the perfect interior or exterior solution.

Solex laminate is Deceuninck's custom-crafted solution to add color and style to windows and doors throughout your home or building.

Homeowners and architects can add architectural detail and interior design flair with the use of Solex laminates, inside and out.

NOTE: Lead times vary by color selection.

XENOTEST: SOLEX VERSUS PAINT

SOLEX MAKES THE GRADE

To help ensure that Solex performs in any climate, exterior colors are tested in xenon accelerated weathering equipment and also real-time, outdoor testing to verify durability.

Don't just take our word for it. Take a look.

In addition to superior heat reflection and color retention, Solex exterior laminates provide excellent weather resistance, making them ideal for coastal regions.

SMARTER PRODUCTS. SUPERIOR PERFORMANCE.

Solex exterior laminates are multi-layered and designed to perform. Based on Renolit exterior film technology, each layer is engineered to address various environmental issues from heat reflection to weather resistance and color retention.

- A** Transparent polyvinylidene difluoride (**PVDF**) top layer
- B** Transparent **PMMA** upper film
 - Weather-resistant
 - Protection against UV irradiation
- C** **Printing ink** for decors
 - Pigments: Solar Shield Technology (SST)
- D** Pigmented **acrylic** base film
 - SST for reduced heat absorption
 - Improved UV resistance
 - Extended heat resistance
- E** **Primer** on the back

THE RESULT IS A WINDOW FINISH THAT PERFORMS

- Solar Shield Technology helps reduce heat build up
- Resistance to marring and stains
- Resists scratching, chipping, chalking, cracking
- Superior color retention
- Easy to maintain
