# A Spectrum of COLORS

Mix, match and make magic with Solex™.

No matter what the design calls for, Solex™ lamination technology provides today's richest exterior colors, stunning natural woodgrain details and metallic architectural finishes to create the perfect interior or exterior solution.

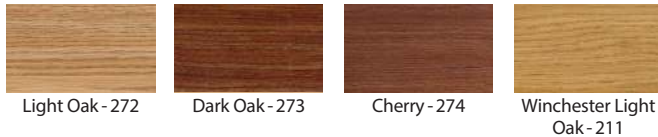

Solex™ laminate is Deceuninck's custom-crafted solution to add color and style to windows and doors throughout your home or building.

Homeowners and architects can add architectural detail and interior design flair with the use of Solex™ laminates, inside and out.

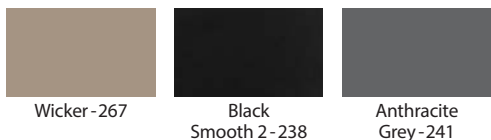

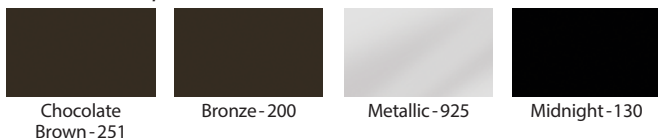

In addition to superior heat reflection and color retention, Solex™ exterior laminates provide excellent weather resistance, making them ideal for coastal regions.

NOTE: Lead times vary by color selection.

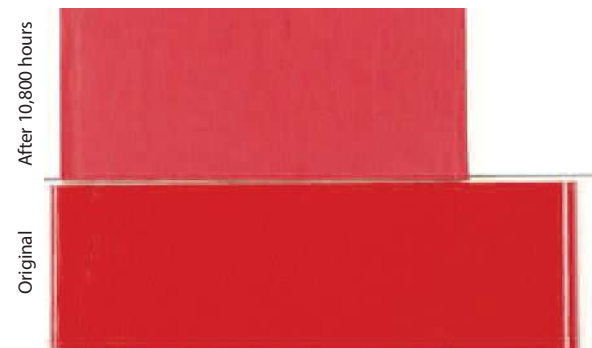

# XENOTEST: Solex™ Versus Paint

Solex™ makes the grade.

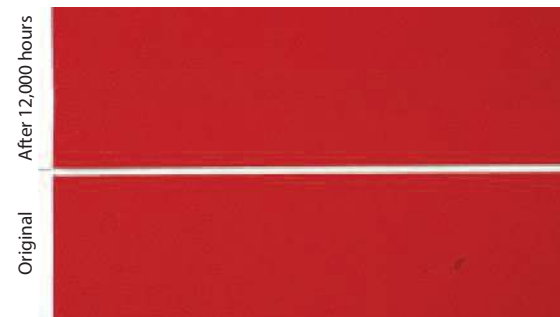

To help ensure that Solex™ performs in any climate, exterior colors are tested in xenon accelerated weathering equipment and also real-time, outdoor testing to verify durability.

Don't just take our word for it. Take a look.

## Paint

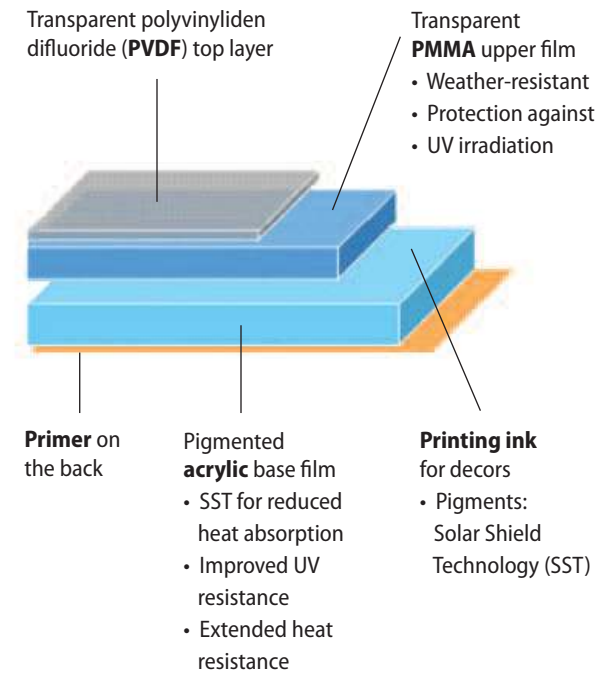

## Solex™ Lamination Technology

# Smarter Products SUPERIOR PERFORMANCE

Solex™ exterior laminates are multi-layered and designed to perform. Based on Renolit exterior film technology, each layer is engineered to address various environmental issues from heat reflection to weather resistance and color retention.

The result is a window finish that performs:

- Solar Shield Technology helps reduce heat build up
- Resistance to marring and stains
- Resists scratching, chipping, chalking, cracking
- Superior color retention
- Easy to maintain
