Press ReleaseOctober 18, 2016

Deceuninck North America Celebrates Grand Opening of Fernley, Nevada Facility

Deceuninck North America is marking a significant milestone in its continued growth with the grand opening of a 150,000-square-foot-facility near Reno, Nevada. The \$20 million facility, which sits on a 28-acre site, can accommodate up to 24 extrusion lines and includes manufacturing support, offices and a warehouse.

“Our western expansion creates the potential for significant growth and reinforces Deceuninck’s commitment to existing customers in the West and further meets the need for window systems, profiles and tools designed for the western market and climate,” said Filip Geeraert, president and CEO, Deceuninck North America, which is headquartered in Monroe, Ohio. “We are honoured to celebrate the grand opening of our Fernley plant with our valued customers, fabricators, Reno-area officials and the international business community.”

In addition to Geeraert, featured speakers at the grand opening ceremony include:

- Francis Van Eeckhout, CEO, Deceuninck Group
- Henri Vantieghem, Consul General of Belgium in Los Angeles
- Roy Edgington Jr., Mayor, Fernley, Nevada

Event attendees will also take a tour of the facility to see first-hand the culmination of the plant’s strategic design and construction. As a purpose-built plant, the facility was designed and built specifically to meet Deceuninck’s manufacturing requirements. The facility features a streamlined manufacturing flow, from the two railroad spurs serving the Fernley location to the movement of materials through the facility and shipment of the finished product. The plant is also built to accommodate future growth.

The Fernley facility will have an initial staff of 35.

“The Fernley plant is a significant addition for the Deceuninck Group business and will enable our North American operations to more efficiently serve its western customers as the industry continues to evolve its lean manufacturing approach,” Van Eeckhout said.
