

# ECLIPSE

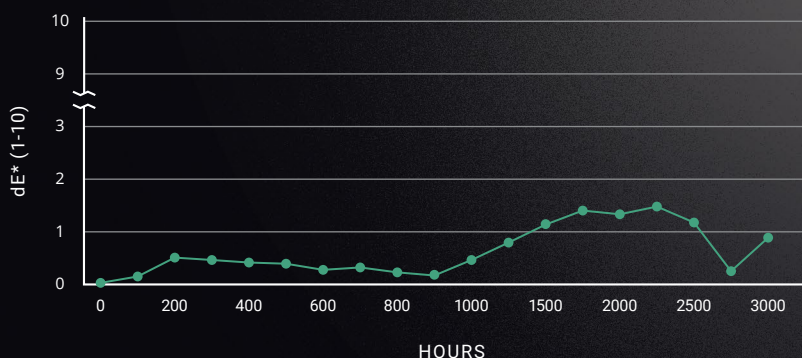

## It's what you've been waiting for.

In response to soaring market demand for dark colored windows and doors, Deceuninck material scientists went to work to develop an alternative to laminate, capstock, or paint. Introducing ECLIPSE, black PVC profiles engineered to provide in-demand aesthetics with essential performance.

### BENEFITS

- Helps satisfy strong market demand
- Differentiates from the competition
- Speeds fabrication by eliminating need to touch-up
- Cost competitive with laminate
- Available to customers in 2024

### ECLIPSE QUV ACCELERATED WEATHER TESTING

\*After 3,000 hours of QUV testing, the highest dE measured for ECLIPSE profiles is 1.48. A dE from 1 to 2 represents a minimal color difference or a difference that only an experienced observer can detect. ECLIPSE profiles are being continually industry tested for weathering and heat absorption.

PROPRIETARY DECEUNINCK SUNSHIELD®  
TECHNOLOGY TO MINIMIZE FADING

ENGINEERED PIGMENT TECHNOLOGY  
THAT LIMITS HEAT ABSORPTION

VENTED PROFILES TO FURTHER  
MODERATE TEMPERATURE

UNDERGOING CONTINUOUS  
WEATHERING AND HEAT TESTING
